

PRODUCT DESCRIPTION

Fieldway® FWT-3707 Arc Flash Gloves are engineered to provide reliable protection against electric arc hazards in high-risk industrial and electrical environments. Featuring a multi-layer insulated construction with flame-resistant technology, these gloves deliver excellent thermal protection while maintaining superior flexibility and comfort. Designed for professionals working around energized equipment, the ergonomic fit and enhanced grip ensure maximum dexterity, allowing users to perform precision tasks safely and efficiently. Built to meet demanding industrial safety requirements, these gloves are an ideal choice for electrical maintenance, power utilities, and critical infrastructure applications.

FEATURES

- Certified Arc Flash Protection
- Multi-Layer Insulated Construction
- Flame Resistant Technology
- Enhanced Grip & Dexterity
- Ergonomic & Comfortable Design
- Industry-Compliant Safety Performance

APPLICATIONS

- Substation Work
- Underground Electrical Installations
- Electrical Panel & Breaker Room Maintenance
- Plant Shutdowns
- Energized Equipment Repair
- Facility Electrical Works
- Electric Vehicle Servicing
