PRODUCT DESCRIPTION

The Fieldway® FWT-2001 Welding Glove is a sturdy, long-life glove designed to deliver excellent protection against heat and small molten metal splashes. Reinforcement at the thumb base area adds durability where it matters most. Sewn with strong, heat-resistant Kevlar® thread, these gloves are ideal for a wide range of welding applications in steel, aluminum and other metals, as well as cutting and grinding tasks.

FEATURES

- Sturdy, long-life welding gloves
- Great protection against heat and small molten metal splashes
- Designed with thumb base area reinforcement
- Sewn with strong, heat-resistant Kevlar thread
- Suitable for welding in steel, aluminum and other metals
- Useful for cutting, grinding and general industrial work

STANDARDS & COMPLIANCE

423X4X

TECHNICAL SPECIFICATIONS

Product Code	FWT-2001
Product Name	Welding Glove
Material	Premium Split Leather
Stitching	Heat-Resistant Kevlar Thread
Reinforcement	Thumb Base Reinforcement
Protection	Heat and Molten Splash Protection
Usage	Welding, Cutting, Grinding
Color	Yellow / White
Applications	Industrial / Welding

APPLICATIONS

Rigs

Oil and Gas Industry

Refinery

Production and Processing Services

FIELDWAY TECHNOLOGIES

Reliable Protection. Trusted Performance.
