FEATURES

- Designed for direct contact with temperatures up to 300°C.
- Gray Wolf® aluminized premium-grade natural leather protects against direct spills and splashes of molten metals.
- The upper layer reflects up to 95% of radiant heat and is sewn with heat-resistant Kevlar® thread.
- Premium-grade natural leather provides long service life and excellent dexterity.
- 100% DuPont™ Kevlar lining delivers strong mechanical and thermal protection.
- Kevlar-thread stitching; customization is available on customer request.

APPLICATIONS

Foundry casting and glass handling | Metal fabrication and welding |
